

## Safety Data Sheet

according to 29 CFR 1910.1200 App D (OSHA Hazard Communication Standard)

### Strawberry Lemonade Fragrance Oil

Version number: GHS 1.0

Date of compilation: 2025-04-10

#### SECTION 1: Identification

##### 1.1 Product identifier

|                |                                                                         |
|----------------|-------------------------------------------------------------------------|
| Trade name     | Strawberry Lemonade Fragrance Oil                                       |
| Product SKU(s) | FR10STL (10 mL), FR30STL (30 mL), FR100STL (100 mL), FR16STL (16 fl oz) |

##### 1.2 Recommended uses

|                     |                                              |
|---------------------|----------------------------------------------|
| Recommended uses    | General use                                  |
| Restrictions on use | For external use only, not for internal use. |

##### 1.3 Details of the supplier of the safety data sheet

|                           |                                                                              |
|---------------------------|------------------------------------------------------------------------------|
| Name and Address          | P&J Trading<br>990 Calle Amanecer<br>San Clemente, CA 92673<br>United States |
| Telephone                 | 888-614-2112                                                                 |
| Telefax                   | 888-634-2260                                                                 |
| e-mail                    | customerservice@pandjtrading.com                                             |
| Website                   | www.pandjtrading.com                                                         |
| e-mail (competent person) | customerservice@pandjtrading.com                                             |

##### 1.4 Emergency telephone number

|                                          |              |
|------------------------------------------|--------------|
| Emergency information service (INFOTRAC) | 800-535-5053 |
| INFOTRAC contract number                 | 108042       |

## SECTION 2: Hazard(s) identification

### 2.1 Classification of the substance or mixture

Classification acc. to OSHA "Hazard Communication Standard" (29 CFR 1910.1200)

| Section | Hazard class       | Category | Hazard class and category | Hazard statement |
|---------|--------------------|----------|---------------------------|------------------|
| A.4S    | skin sensitization | 1        | Skin Sens. 1              | H317             |

For full text of abbreviations: see SECTION 16.

### 2.2 Label elements

Labelling acc. to OSHA "Hazard Communication Standard" (29 CFR 1910.1200)

|             |         |
|-------------|---------|
| Signal word | warning |
|-------------|---------|

#### Pictograms

GHS07

#### Hazard statements

|      |                                      |
|------|--------------------------------------|
| H317 | May cause an allergic skin reaction. |
|------|--------------------------------------|

#### Precautionary statements

|           |                                                                            |
|-----------|----------------------------------------------------------------------------|
| P261      | Avoid breathing dust/fume/gas/mist/vapors/spray.                           |
| P272      | Contaminated work clothing must not be allowed out of the workplace.       |
| P280      | Wear protective gloves/protective clothing/eye protection/face protection. |
| P302+P352 | If on skin: Wash with plenty of water.                                     |
| P321      | Specific treatment (see on this label).                                    |
| P333+P313 | If skin irritation or rash occurs: Get medical advice/attention.           |
| P363      | Wash contaminated clothing before reuse.                                   |
| P501      | Dispose of contents/container to industrial combustion plant.              |

### 2.3 Other hazards

|                                           |                                                                                   |
|-------------------------------------------|-----------------------------------------------------------------------------------|
| Results of PBT and vPvB assessment        | Does not contain a PBT-/vPvB-substance at a concentration of $\geq 0.1\%$ .       |
| Endocrine disrupting properties           | Does not contain an endocrine disruptor (ED) in a concentration of $\geq 0.1\%$ . |
| Ingredient(s) with unknown acute toxicity | 0% — no components with unknown acute toxicity.                                   |

**SECTION 3: Composition/information on ingredients****3.1 Substances**

Not relevant (mixture)

**3.2 Mixtures**

Description of the mixture

| Name of substance | Identifier                        | Wt%     | Classification acc. to GHS                | Pictograms                                                                          |
|-------------------|-----------------------------------|---------|-------------------------------------------|-------------------------------------------------------------------------------------|
| LIME OIL MEXICAN  | CAS No<br>8008-26-2<br>90063-52-8 | 1 – < 5 | Flam. Liq. 3 / H226                       |  |

| LINALOOL 925      | CAS No<br>78-70-6                 | < 1     | Skin Sens. 1B / H317; Flam. Liq. 4 / H227 |  |

**3.3 Remarks**

For full text of abbreviations: see SECTION 16

|                     |                                                                                                                                                                                |
|---------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Trade secret</b> | The exact percentage (concentration) of the ingredients has been withheld as a trade secret; concentration ranges are provided in accordance with 29 CFR 1910.1200 Appendix D. |
|---------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

**SECTION 4: First-aid measures****4.1 Description of first-aid measures**

|                               |                                                                                                                                                                                                                                                                                                                                                    |
|-------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>General notes</b>          | Do not leave affected person unattended. Remove victim out of the danger area. Keep affected person warm, still and covered. Take off immediately all contaminated clothing. In all cases of doubt, or when symptoms persist, seek medical advice. In case of unconsciousness place person in the recovery position. Never give anything by mouth. |
| <b>Following inhalation</b>   | If breathing is irregular or stopped, immediately seek medical assistance and start first aid actions. Provide fresh air.                                                                                                                                                                                                                          |
| <b>Following skin contact</b> | Wash with plenty of soap and water.                                                                                                                                                                                                                                                                                                                |
| <b>Following eye contact</b>  | Remove contact lenses, if present and easy to do. Continue rinsing. Irrigate copiously with clean, fresh water for at least 10 minutes, holding the eyelids apart.                                                                                                                                                                                 |
| <b>Following ingestion</b>    | Rinse mouth with water (only if the person is conscious). Do NOT induce vomiting.                                                                                                                                                                                                                                                                  |

**4.2 Most important symptoms and effects, both acute and delayed**

Symptoms and effects are not known to date.

**4.3 Indication of any immediate medical attention and special treatment needed**

none

**SECTION 5: Fire-fighting measures****5.1 Extinguishing media**

|                                       |                                                           |
|---------------------------------------|-----------------------------------------------------------|
| <b>Suitable extinguishing media</b>   | Water spray, BC-powder, Carbon dioxide (CO <sub>2</sub> ) |
| <b>Unsuitable extinguishing media</b> | Water jet                                                 |

**5.2 Special hazards arising from the substance or mixture**

|                                      |                                                         |
|--------------------------------------|---------------------------------------------------------|
| <b>Hazardous combustion products</b> | Carbon monoxide (CO), Carbon dioxide (CO <sub>2</sub> ) |
|--------------------------------------|---------------------------------------------------------|

**5.3 Advice for firefighters**

In case of fire and/or explosion do not breathe fumes. Coordinate firefighting measures to the fire surroundings. Do not allow firefighting water to enter drains or water courses. Collect contaminated firefighting water separately. Fight fire with normal precautions from a reasonable distance.

**SECTION 6: Accidental release measures****6.1 Personal precautions, protective equipment and emergency procedures**

|                                    |                                                                    |
|------------------------------------|--------------------------------------------------------------------|
| <b>For non-emergency personnel</b> | Remove persons to safety.                                          |
| <b>For emergency responders</b>    | Wear breathing apparatus if exposed to vapors/dust/aerosols/gases. |

**6.2 Environmental precautions**

Keep away from drains, surface and ground water. Retain contaminated washing water and dispose of it. If substance has entered a water course or sewer, inform the responsible authority.

**6.3 Methods and material for containment and cleaning up**

|                                                          |                                                                                                                                |
|----------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------|
| <b>Advice on how to contain a spill</b>                  | Covering of drains                                                                                                             |
| <b>Advice on how to clean up a spill</b>                 | Wipe up with absorbent material (e.g. cloth, fleece). Collect spillage: sawdust, kieselgur (diatomite), sand, universal binder |
| <b>Appropriate containment techniques</b>                | Use of adsorbent materials.                                                                                                    |
| <b>Other information relating to spills and releases</b> | Place in appropriate containers for disposal. Ventilate affected area.                                                         |

**6.4 Reference to other sections**

Hazardous combustion products: see section 5. Personal protective equipment: see section 8. Incompatible materials: see section 10. Disposal considerations: see section 13.

**SECTION 7: Handling and storage****7.1 Precautions for safe handling**

|                                                                        |                                                                                                                                                                                                                                                                                                                                                |
|------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Recommendations</b>                                                 |                                                                                                                                                                                                                                                                                                                                                |
| <b>Measures to prevent fire as well as aerosol and dust generation</b> | Use local and general ventilation. Use only in well-ventilated areas.                                                                                                                                                                                                                                                                          |
| <b>Advice on general occupational hygiene</b>                          | Wash hands after use. Do not eat, drink and smoke in work areas. Remove contaminated clothing and protective equipment before entering eating areas. Never keep food or drink in the vicinity of chemicals. Never place chemicals in containers that are normally used for food or drink. Keep away from food, drink and animal feedingstuffs. |

## 7.2 Conditions for safe storage, including any incompatibilities

|                                  |                                                                                                |
|----------------------------------|------------------------------------------------------------------------------------------------|
| <b>Packaging compatibilities</b> | Only packagings which are approved (e.g. acc. to the Dangerous Goods Regulations) may be used. |
|----------------------------------|------------------------------------------------------------------------------------------------|

## 7.3 Specific end use(s)

See section 16 for a general overview.

## SECTION 8: Exposure controls/personal protection

### 8.1 Control parameters

Occupational exposure limit values (Workplace Exposure Limits)

| Country | Name of substance                | CAS No    | Identifier | TWA [ppm] | Notation | Source      |
|---------|----------------------------------|-----------|------------|-----------|----------|-------------|
| US      | (2E)-3,7-dimethylocta-2,6-dienal | 5392-40-5 | TLV®       | 5         | iv, H    | ACGIH® 2024 |

#### Legend

|                  |                                                                                                                                                                          |
|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Ceiling-C</b> | ceiling value is a limit value above which exposure should not occur                                                                                                     |
| <b>H</b>         | absorbed through the skin                                                                                                                                                |
| <b>iv</b>        | inhalable fraction and vapor                                                                                                                                             |
| <b>STEL</b>      | short-term exposure limit: a limit value above which exposure should not occur and which is related to a 15-minute period (unless otherwise specified)                   |
| <b>TWA</b>       | time-weighted average (long-term exposure limit): measured or calculated in relation to a reference period of 8 hours time-weighted average (unless otherwise specified) |

| <b>Appropriate engineering controls</b>                               | General ventilation.                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>Individual protection measures (personal protective equipment)</b> |                                                                                                                                                                                                                                                                                                                                                                                                                          |
| <b>Eye/face protection</b>                                            | Wear eye/face protection.                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>Skin protection</b>                                                |                                                                                                                                                                                                                                                                                                                                                                                                                          |
| <b>Hand protection</b>                                                | Wear suitable gloves. Chemical protection gloves are suitable, which are tested according to EN 374. Check leak-tightness/impermeability prior to use. In the case of wanting to use the gloves again, clean them before taking off and air them well. For special purposes, it is recommended to check the resistance to chemicals of the protective gloves mentioned above together with the supplier of these gloves. |
| <b>Other protection measures</b>                                      | Take recovery periods for skin regeneration. Preventive skin protection (barrier creams/ointments) is recommended. Wash hands thoroughly after handling.                                                                                                                                                                                                                                                                 |
| <b>Respiratory protection</b>                                         | In case of inadequate ventilation wear respiratory protection.                                                                                                                                                                                                                                                                                                                                                           |
| <b>Environmental exposure controls</b>                                | Use appropriate container to avoid environmental contamination. Keep away from drains, surface and ground water.                                                                                                                                                                                                                                                                                                         |

**SECTION 9: Physical and chemical properties****9.1 Information on basic physical and chemical properties****9.1.1 Appearance**

|                       |                       |
|-----------------------|-----------------------|
| <b>Physical state</b> | liquid                |
| <b>Color</b>          | not determined        |
| <b>Particle</b>       | not relevant (liquid) |
| <b>Odor</b>           | characteristic        |

**9.1.2 Other safety parameters**

|                                                |                                               |
|------------------------------------------------|-----------------------------------------------|
| <b>pH (value)</b>                              | not determined                                |
| <b>Melting point/freezing point</b>            | not determined                                |
| <b>Initial boiling point and boiling range</b> | 266 °F at 1,030 hPa                           |
| <b>Flash point</b>                             | 201 °F                                        |
| <b>Evaporation rate</b>                        | Not determined                                |
| <b>Flammability (solid, gas)</b>               | not relevant, (fluid)                         |
| <b>Vapor pressure</b>                          | 170.9 Pa at 25 °C                             |
| <b>Density</b>                                 | not determined                                |
| <b>Vapor density</b>                           | this information is not available             |
| <b>Relative density</b>                        | Information on this property is not available |
| <b>Solubility(ies)</b>                         | not determined                                |

## Partition coefficient

|                                    |                                                        |
|------------------------------------|--------------------------------------------------------|
| <b>- n-octanol/water (log KOW)</b> | this information is not available                      |
| <b>Auto-ignition temperature</b>   | 464 °F (auto-ignition temperature (liquids and gases)) |
| <b>Viscosity</b>                   | not determined                                         |
| <b>Explosive properties</b>        | none                                                   |
| <b>Oxidizing properties</b>        | none                                                   |

**9.2 Other information**

|                                                 |                                                                       |
|-------------------------------------------------|-----------------------------------------------------------------------|
| <b>Liquid content</b>                           | 93.6 %                                                                |
| <b>Solid content</b>                            | 6.4 %                                                                 |
| <b>Temperature class (USA, acc. to NEC 500)</b> | T2C (maximum permissible surface temperature on the equipment: 230°C) |

**SECTION 10: Stability and reactivity****10.1 Reactivity**

Concerning incompatibility: see below "Conditions to avoid" and "Incompatible materials".

**10.2 Chemical stability**

See below "Conditions to avoid".

**10.3 Possibility of hazardous reactions**

No known hazardous reactions.

**10.4 Conditions to avoid**

There are no specific conditions known which have to be avoided.

**10.5 Incompatible materials**

Oxidizers

**10.6 Hazardous decomposition products**

Reasonably anticipated hazardous decomposition products produced as a result of use, storage, spill and heating are not known. Hazardous combustion products: see section 5.

**SECTION 11: Toxicological information****11.1 Information on toxicological effects**

Test data are not available for the complete mixture.

|                                 |                                                                                                           |
|---------------------------------|-----------------------------------------------------------------------------------------------------------|
| <b>Classification procedure</b> | The method for classification of the mixture is based on ingredients of the mixture (additivity formula). |
|---------------------------------|-----------------------------------------------------------------------------------------------------------|

**Classification acc. to OSHA "Hazard Communication Standard" (29 CFR 1910.1200)**

|                                                           |                                                                                                          |
|-----------------------------------------------------------|----------------------------------------------------------------------------------------------------------|
| <b>Acute toxicity</b>                                     | Shall not be classified as acutely toxic. GHS of the United Nations, annex 4: May be harmful if inhaled. |
| <b>Skin corrosion/irritation</b>                          | Shall not be classified as corrosive/irritant to skin.                                                   |
| <b>Serious eye damage/eye irritation</b>                  | Shall not be classified as seriously damaging to the eye or eye irritant.                                |
| <b>Respiratory or skin sensitization</b>                  | May cause an allergic skin reaction.                                                                     |
| <b>Germ cell mutagenicity</b>                             | Shall not be classified as germ cell mutagenic.                                                          |
| <b>Carcinogenicity</b>                                    | Shall not be classified as carcinogenic.                                                                 |
| <b>Reproductive toxicity</b>                              | Shall not be classified as a reproductive toxicant.                                                      |
| <b>Specific target organ toxicity - single exposure</b>   | Shall not be classified as a specific target organ toxicant (single exposure).                           |
| <b>Specific target organ toxicity - repeated exposure</b> | Shall not be classified as a specific target organ toxicant (repeated exposure).                         |

|                          |                                                             |
|--------------------------|-------------------------------------------------------------|
| <b>Aspiration hazard</b> | Shall not be classified as presenting an aspiration hazard. |
|--------------------------|-------------------------------------------------------------|

## SECTION 12: Ecological information

### 12.1 Toxicity

Very toxic to aquatic life with long lasting effects.

### 12.2 Persistence and degradability

Data are not available.

### 12.3 Bioaccumulative potential

Data are not available.

### 12.4 Mobility in soil

Data are not available.

### 12.5 Results of PBT and vPvB assessment

Does not contain a PBT-/vPvB-substance at a concentration of  $\geq 0.1\%$ .

### 12.6 Endocrine disrupting properties

Does not contain an endocrine disruptor (ED) in a concentration of  $\geq 0.1\%$ .

### 12.7 Other adverse effects

Data are not available.

## SECTION 13: Disposal considerations

### 13.1 Waste treatment methods

|                                               |                                                                                                                                                                                       |
|-----------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Sewage disposal-relevant information</b>   | Do not empty into drains. Avoid release to the environment. Refer to special instructions/safety data sheets.                                                                         |
| <b>Waste treatment of containers/packages</b> | Only packagings which are approved (e.g. acc. to DOT) may be used. Completely emptied packages can be recycled. Handle contaminated packages in the same way as the substance itself. |

### 13.2 Remarks

Please consider the relevant national or regional provisions. Waste shall be separated into the categories that can be handled separately by the local or national waste management facilities.

## SECTION 14: Transport information

### 14.1 UN number

|                  |         |
|------------------|---------|
| <b>DOT</b>       | UN 3082 |
| <b>IMDG-Code</b> | UN 3082 |
| <b>ICAO-TI</b>   | UN 3082 |

### 14.2 UN proper shipping name

|                                               |                                                     |
|-----------------------------------------------|-----------------------------------------------------|
| <b>DOT</b>                                    | Environmentally hazardous substance, liquid, n.o.s. |
| <b>IMDG-Code</b>                              | ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S. |
| <b>ICAO-TI</b>                                | Environmentally hazardous substance, liquid, n.o.s. |
| <b>Technical name (hazardous ingredients)</b> | DIOCTYL ADIPATE, ALDEHYDE C-16                      |

**14.3 Transport hazard class(es)**

|           |   |
|-----------|---|
| DOT       | 9 |
| IMDG-Code | 9 |
| ICAO-TI   | 9 |

**14.4 Packing group**

|           |     |
|-----------|-----|
| DOT       | III |
| IMDG-Code | III |
| ICAO-TI   | III |

**14.5 Environmental hazards**

|                                                           |                                      |
|-----------------------------------------------------------|--------------------------------------|
| Environmental hazards                                     | hazardous to the aquatic environment |
| Environmentally hazardous substance (aquatic environment) | DIOCTYL ADIPATE, ALDEHYDE C-16       |

**14.6 Special precautions for user**

There is no additional information.

**14.7 Transport in bulk according to IMO instruments**

The cargo is not intended to be carried in bulk.

**Information for each of the UN Model Regulations****Transport of dangerous goods by road or rail (49 CFR US DOT) - Additional information**

| <b>vPvB</b>           | Very Persistent and very Bioaccumulative                                                                      |

**Key literature references and sources for data**

OSHA Hazard Communication Standard (HCS), 29 CFR 1910.1200.

Transport of dangerous goods by road or rail (49 CFR US DOT). International Maritime Dangerous Goods Code (IMDG).

Dangerous Goods Regulations (DGR) for the air transport (IATA).

**Classification procedure**

Physical and chemical properties: The classification is based on tested mixture. Health hazards, Environmental hazards: The method for classification of the mixture is based on ingredients of the mixture (additivity formula).

**List of relevant phrases (code and full text as stated in section 2 and 3)**

| Code | Text                                 |
|------|--------------------------------------|
| H226 | Flammable liquid and vapor.          |
| H227 | Combustible liquid.                  |
| H302 | Harmful if swallowed.                |
| H315 | Causes skin irritation.              |
| H317 | May cause an allergic skin reaction. |
